FOR THE BEST INTERESTS
OF
CAMPBELL AND COMMUNITY

VOL. 32, NO. 32

CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA.

FRIDAY, FEB. 4, 1927

Mrs. Marie Alamo Bodem of Santa Cruz, has the distinction of being the only woman engaged in California as a milk inspector.

Members of the newly organized Woodbridge Fruit Growers association at Lodi, are growers of 300 carloads of fruit annually.

Practically undisturbed by the earthquakes which ushered in the New Year Calico cotton gins are turning out more cotton than they did at this time last year.

Poultrymen of Butte county held a meeting on January 28, when Dr. W. F. Hoist of the poultry division, University of California, discussed feeds and feeding.

A windbreak planting campaign has been inaugurated in San Bernardino and Riverside counties and will be conducted by the horticultural departments of the counties.

A certain amount of protein is absolutely essential in cattle feeding operations. Where alfalfa or clover hay is the sole roughage, it is not necessary to use any protein.

The orange industry at Glendora is the district's greatest asset. The 1926 crop of approximately 1,400 cars was shipped by the six local packing-houses and brought a return exceeding \$2,000,000.

For thirty-seven years John Menne has sown and harvested grain in the Ducor district and this year he will have about 1,300 acres so planted. He reports the soil in excellent shape and the growth excellent and believes this will be a bountiful cereal year.

The Fontana Farms company has announced the engagement of R. L. Nougaret as consulting viticulturist and grape expert of the Fontana community, the company co-operating with the Fontana Grape growers exchange in securing Mr. Nougaret's services for the owners of the district's 5,000 vineyard acres.

Turkey shipping from Arbuckle is still going on. A. C. Hanis of Runningan shipped 1,500 pounds last week and 4,500 pounds the week before. Since Thanksgiving 20,500 pounds of dressed turkeys have been shipped to Los Angeles and San Francisco, bringing an average of 45 cents a pound.

No change is to be made in present methods of classifying cotton tendered on future contracts, the department of agriculture has announced, following a conference January 10, with representatives of the cotton industry, at which it was the consensus of opinion that the method now used by the department is the most practical one under existing conditions.

Some of the packing houses report that a number of ten-acre orange groves in the Redlands section produced crops that sold for over \$6,000 the past season. A return of \$600 an acre is regarded as excellent, even with the heavy expense entailed by the purchase of new heaters and oil. The outlook for marketing the coming crop is promising.

Oroville orange growers have received more than \$200,000 during the season just closed from the Stewart Fruit company. This is made known by H. C. Poor, district manager. Growers had one of the best seasons this year in the orange history. The crop was heavy and prices were good and remained stable throughout the season.

Albert Rosman, who works on the Swingle ranch on the state highway between Davis and Sacramento, is cultivating and raising wheat known as White Rye. White Rye is not known much in California. White Rye will make pure white flour, and it grows easier than wheat and has no changing of color. His main object is to interest the people, and raises it for a hobby.

Conditions in the grass sections of California have been very favorable this season. Feed is abundant and weather conditions have been quite good throughout the last few months. Cattle are doing well, and indications are that grass-finished cattle will be early this year, beginning to move off about the 1st of April. This is according to a report issued by the California Cattlemen's association. This situation should not in any way weaken present cattle markets, as supplies of fed cattle coming ready are just about sufficient to equal the demand.

Golden State

News of Interest to All

Approximately 100 new houses are to be built in the valley section of Burbank at once, according to reports.

The formal dedication of the new \$100,000 St. Josephs Catholic church in East Bakersfield took place Sunday, January 23.

A record for the first two weeks of the year was smashed when Santa Monica building permits for that period reached \$194,643.

The 1927 raisin festival at Fresno, will be celebrated on Saturday, April 30. This was decided by a unanimous action of the California Raisin Festival association.

Real estate and oil activity in Huntington Beach during the past year has caused the expenditure of more than \$30,000,000, it is estimated by bankers, oil men and real estate dealers.

Dr. A. C. Baker, entomologist of the United States department of agriculture, has arrived at the citrus experiment station at Riverside, to direct a campaign against the white fly, deadly citrus pest.

With Sacramento selected as the convention city for high school principals of California, plans are already being worked out for the entertainment of the visitors, who will be in the Capitol City several hundred strong April 11 to 15.

With \$25,000 already subscribed by Stockton Jewish people toward the proposed new Jewish Community Center to be erected in that city a committee including non-Jewish business men of the city has been formed to raise the remaining necessary \$25,000.

Plans are being completed by an architect for a two-story frame and stucco addition to the Sunday school section of the Presbyterian church of Livermore. There will be class rooms, a rest room and a large kitchen. The improvements will cost about \$20,000.

Details of Governor C. C. Young's budget plan for permanent improvements at the eight state curative institutions became known with compilation of figures showing that the new administration intends to devote \$2,186,000 during the next two years to construction of new buildings and repair work deemed necessary at the various hospitals.

Improvements which will greatly increase the capacity of the packing plant of the David Hewes Orange and Lemon association at El Modena have been started. The work is being done jointly by the Southern Pacific company, owner of the building and the association, which has a long-time lease on the property. The cost is estimated at \$25,000.

Southern California again assumes prominence as a fast-growing industrial center through the establishment of a new industry, the manufacture of airplanes, which will focus the attention of the aviation world upon Los Angeles. The International Aircraft

E. E. Holly, Suisun, was appointed chief deputy superintendent of banks under Will C. Wood. Definite announcement was made by Holly, setting at rest rumors which have prevailed since Holly resigned his position as cashier and general manager of the First National Bank of Suisun, which position he has held for twenty-three years. Holly will maintain offices in San Francisco and he expects to assume his new duties in a few weeks.

William C. Morrison, Marysville, head of the agricultural department of the Marysville Union High school, has secured a permit to build a residence and garage to cost in the neighborhood of \$3,000. Students in the manual training department of the school are to take part in the construction of the buildings, to give them practical experience in carpentering and other lines. They will work under the contractor.

A phenomenal growth of the California National Guard during the past three years is reflected in the biennial report of Adjutant General R. A. Mittlestaedt, which has just been issued in the hands of Governor C. C. Young. Since January 1, 1924, the strength of the organization has leaped from 3,200 men and officers to 5,600 at the present time, the maximum strength authorized by the United States War Department.

More motorists are coming to Pasadena this winter from Michigan than from any other state, according to the records of the Pasadena office of the Automobile Club of Southern California. The calculation is made on the basis of out-of-state motorists who have called at the office to have their license registration changed. Iowa is second and Minnesota third, according to office reports. Approximately 350 of these applications have been received in the last two weeks. Every state in the Union is represented except Rhode Island, South Carolina, Georgia, Utah and Wyoming.

CAMPBELL TEAM PLAYS SAN JOSE NEXT SATURDAY

Next Saturday night, in the Campbell gym, the Campbell Alumni basketball team will play the first of a two-game series with the San Jose Y. G. The Alumni seem to have a slight edge because of their weight and strong defensive power. The Y. G. are fast but are a little too short and small to stop the Alumni offense without committing fouls. The game will give the fans plenty of action and excitement nevertheless, as the Y. G. are steadily improving, and might hit their stride against the Alumni.

In their last thirteen games, the Alumni have scored 493 points to 276 scored by their opponents. This shows off the Alumni scoring power to advantage as they have played against some of the strongest teams that could be secured. The small score made by the opponents also shows that the defensive power of the Alumni is very strong.

Stark, Cook and Meredith seem to be the chief scorers for the Y. G. They are fast, experienced men and should give the Campbell guards a great deal of worry. Blesh and Hines, regular Y. G. guards, are very strong defensive men against opponents of their own size. How they will stand up against the fast heavy Alumni men remains to be seen.

In M. Nelson, C. Nelson, Eddleman and Kalas, Coach Noddin has four of the best offensive men that can be found. The last three named have all played center, guard, and forward position and hence are a great asset to a team because they can ably fill in any position whenever needed. Alumni have piled up such big scores over their opponents. Reed, Alumni running guard, was twice chosen all P. A. L. running guard in his high school days. Shelley, standing guard, is a tower of strength on the defense and is an accurate shot when long baskets are needed to win games. In spite of this weight, he is fast on his feet and has stopped every offense he has met this season. Stendorf and Cramer are strong reserves that can ably fill in when needed.

The Trailblazer Tribe

Last week five boys, Mark Tusup, Roy Kosick, James Brain, Harvey Voge, and Willard Loughlin, met together and formed "The Trailblazers." As five or more are required before a charter may be sent for, they filled out tribe constitution blanks and sent for an official charter.

Harvey Voge was elected chief, Roy Kosick holds the office of scribe, Mark Tusup, scribe and James Brain, wampum bearer. Willard Loughlin organized the tribe.

The Lone Scout silver merit medal and the title of Lone Scout Scribe (LSS) was recently bestowed upon Willard Loughlin of Campbell by the national headquarters in New York. The medal was won for literary efforts in the way of amateur journalism contributed to the various authorized Lone Scout Amateur publications. Is on the editorial staff of several of these publications printed by Lone Scouts in various parts of the country.

The tribe hopes soon to have an official organ, which will probably be called "The Trailblazer."

In the space of a few short years, southern California has forged to the front in the United States in an industry which, according to department of agriculture experts, is destined to become an important one in this country, the breeding of rabbits for fur and market purposes. Fifty per cent of the rabbit fur produced in the United States is bred in the Los Angeles district.

Officials of the Clover Valley Lumber company at Loyalton, announce that plans are already under way for rebuilding of the buildings destroyed by fire recently. The loss is estimated at \$125,000 fully covered by insurance. Besides the box factory, the planning mill and two filled warehouses were burned. A hot box on a bandsaw in the box factory is believed to have started the blaze.

COMMUNITY PARTY AN ENJOYABLE AFFAIR

A thoroughly delightful community party was enjoyed by a large group which represented all sections of this community.

The ladies had spared no pains to make the room attractive and to have all the details pass off smoothly.

R. H. Hyde made a most efficient master of ceremonies aided by an efficient corps of assistants.

During the counting of the scores, L. J. Carboni sang a group of solos, which were thoroughly appreciated, as Mr. Carboni is a favored singer with Campbell audiences. Mrs. Carboni was his accompanist.

Miss Anna Schulte, who has become very popular with her fund of humorous readings, gave one of those, in costume and concluded with a touching Scotch poem, "Cuddle Doon."

Considerable merriment was aroused by the selection of the prizes and then the refreshment committee served coffee and home-made cakes.

As a concluding feature Mrs. R. H. Hyde led some community singing, with Mrs. G. S. Robson at the piano.

Complete returns were not in but the financial results promised to be very satisfactory, and the members wish to express their sincere appreciation of the hearty response with which their efforts were met, and the suggestion for others in the future.

CAMPBELL CAGERS PLAY PALO ALTO

Friday night the Campbell team stands a good chance to win this game as they were just six points behind the Palo Altoans. The Campbell boys have a fighting courage and many of them will exhibit some great playing.

The Palo Altoans have lost one game this year. The Campbell boys have not been so lucky but we are all hoping for better luck. The 130's have also a fine chance. They lost by a greater score but they showed lots of courage and hope to win.

As yet the Campbell teams have had very little support. This game is at home, so let's have a full house.—J. Hiatt.

Last Friday night Campbell 130's and unlimited teams suffered two defeats. San Jose victor, in both contests, exhibited a flashy brand of basketball. The San Jose quintet showed more scoring power in this game than they have previously. Jackson pivotman on the San Jose squad, was high point man with 11 points. M. Shadle, star Campbell forward, was however, the best lightweight on the court. Although he tallied by 8 points, he played a clever floor game.—Dish Lynden.

Foully Murdered

The body of a man about 35 years old and as yet unidentified was found in a ditch partly filled with water on the Cooney ranch near Almaden Monday afternoon of this week. Everything indicates a most brutal murder, his skull being crushed and body otherwise terribly bruised.

The scheme to colonize 10,000 acres of land west of Willows is not yet dead. This is announced by E. Page, one of the promoters of the plan, who was in Willows with representatives of the Swedish and Norwegian governments, whom he has interested in the development project.

Frosts at McFarland have opened the cotton bolls and made picking easier. The quality of cotton now being picked is not particularly good, however. The growers are picking on ly enough to pay their pickers.

BIG ENTERTAINMENT FEATURE FOR OLD SETTLERS' DAY

CONSOLIDATED DISCUSSES BIG PLANS FOR CO.

Complete and hearty endorsement of the Second Annual Fiesta de las Rosas and the participation of every Chamber of Commerce of the County in a special pavilion in the Exposition of Progress, final report on Prune Week, plans for the Santa Clara County Blossom Festival at Saratoga, fine county cooperation for Old Settlers' Day at Campbell, February 22, and the advantages of raising poultry in the county were the leading matters of business at the regular monthly meeting of Santa Clara County Consolidated at Saratoga Inn, Tuesday, February 1st.

Mrs. L. N. Scott, President of the Saratoga Chamber of Commerce, welcomed the members to Saratoga, telling of accomplishments and plans in her city. She announced that Lumber street had been changed to "Big Basin Way" and that the recent raising of funds for a fine library would make it possible for the actual erection of the building in the near future.

Dr. L. Mendelsohn, Chairman of the Blossom Festival Committee stated the plans of the committee outlining the committee's efforts to interest the talent of the county. Dancing, choral singing, and two fine orchestras will furnish the main part of the program. Shelby Patterson stated that every singer of the county was invited to participate and that weekly rehearsals were held at the Foothill Club in Saratoga every Monday evening at 7:30.

C. W. Shumway, President of the Campbell Chamber of Commerce, announced that excellent cooperation on Campbell's Old Settlers' Day, Feb. 22, had been received from each member. He stated that unusual features will mark this year's "Day." P. H. Dunlap was introduced as the new Secretary of the Campbell Chamber of Commerce.

W. F. Powars, Chairman of Prune Week read the final report stating that 20,210 boxes were sold and that the standing of sales in the county were: San Jose first with 12,739 boxes sold; Los Gatos, second with 832 boxes; Palo Alto, Third, with 800 boxes; Mt. View, 660; Gilroy, 600; Sunnyvale, 454; Campbell 357; Santa Clara 338; Morgan Hill, 250; Saratoga 232; Los Altos, 175; and Cupertino 75. Consolidated voted an especial testimonial of thanks to Powars for his excellent work on behalf of the county.

P. T. A. Aids Cafeteria

The Campbell Union Grammar School P. T. A. met Tuesday afternoon in the Kindergarten room. Mrs. Rice, the new President, called the meeting to order.

Miss Wood of the Teacher's College gave a most interesting talk on the pre school age child.

Miss Merriman's class won the attendance prize.

It was voted to use the profit from the supper given, to further equip the cafeteria.

After the business meeting the members adjourned to the Cafeteria. Mrs. Davidson gave a short program on Founder's Day while delicious refreshments were enjoyed.

Takes Vacation

Tuttles Cafeteria which has rendered a splendid and satisfactory service to the people of Campbell closed Feb. 1st to reopen on April 1st.

During this time Mrs. Tuttle will realize a long cherished wish by visiting her people in Neillsville, Wisconsin, leaving Campbell yesterday for her destination. In the meantime Sid will ship about this state taking in the sights and points of interest.

Without the dough there's usually a mess in domestic.

Ebber been down south and heard de colored boys sing dem ole songs? I reckon yo uall haint, so I se gwine to inform yo jest wta to go an how much money to take along in odah to heah a real hones to goodness nigger Minstrel show.

"Kiwanis" means We Build," so we of the Campbell Kiwanis Club are going to build some of our white boys black and turn them lose Tuesday evening, Feb. 22nd at 8 o'clock in the Auditorium of Campbell Union Grammar School. Come and have a good laugh. Tickets on sale by Kiwanis members at 50 cents.

President Shumway of the Chamber of Commerce has appointed Kiwanians to take charge of putting on the big show and every man is going to deliver the goods on time. He appointed:

Dean Whitman, business manager; Horace Lea, advertising; Harvey Cutting, decoration; Steve Sunquist, stage manager; Vic Holmes, ticket sales; Frank Haliwell, box office director; O. Strom, properties.

The first informal rehearsal was held during the lunch hour Wednesday and went over with a bang.

Oluf Strom wielded the hammer in a very effective manner at the Wednesday Kiwanis lunch. He is a contracting "Builder" and feels very much at home with a handle to hang to. The new hydrants are causing as much trouble as old ones during lunch hour.

E. M. Ralph of the San Jose Water Co. gave a short talk on the water problem which is a vital subject over the county. The company is now serving 90,000 people and expects that number to be doubled in twenty years. It now has 21 deep wells all but two pumping from below the 440 foot level. One of the short pipe lines that a short time ago supplied 17,000 gallons per month is now furnishing to that same district 300,000 gallons per month. The company has built 65 miles of pipe line in the past two years. The conservation of water is a most vital problem and the new association is doing good work in its new percolating scheme which is filling the gravel strata along Almaden creek.

Dr. Merrill stated that a new idea has been thought out to reclaim water used through the big proposed sewage system, this water to be used for irrigation after being treated at a reduction plant.

Ada Gardner and Antionette Zilmer of the Campfires served at the tables.

Let George Burrow do it next week and the charity fund will wax fat for the lean and needy. Remember Minstrel practice.

CAMP FIRE SPARKS

The Cherokee Camp Fire Girls elected officers at their meeting last Thursday. They are as follows:

Pres.—Clara Rice
Vice Pres.—Ruth Townsend.
Treas.—Emma May Rapp.
Sec.—Annette Merrill.
Reporters—Miriam Blaine and Mary Maxon.

The Cherokee Group held a Council Fire Saturday night at the home of Helen Stray. Of the seven Crafts, Home Craft was stressed at this Council Fire. Several new members were taken into the group: Margaret Tutt, Emma May Rapp, and Lois Marston. After the Council Fire the girls had a quiet time around the fire roasting marshmallows and singing.

This coming Saturday a Grand Council Fire will be held in San Jose for all Camp Fire Girls in the county.—Polly Maxon.

M. E. CHURCH

W. C. Robins, Pastor.

Prof Clarence Neff, 15 years teacher in the Union College of Foochan China will give an illustrated lecture on "China, past and present" Sunday night at 7:30. Prof. Neff will bring us a lot of first hand information on this restless part of the world. At 11:00 The Sacrament of the Lord's Supper will be celebrated with brief talk by Pastor. Sunday School at 9:45. Come and enjoy this Bible School and profit by it.

Epworth League Bible Study at 5:45. Devotional Service at 6:30. Let us make our Church life strong happy and helpful.

CONG'L CHURCH

Next Sunday at 11 a. m. Preacher, Rev. T. H. Bennett. Subject, "The Courts of God." Special Children's talk. At 7:30. Bright Service Hour, also Young People's meeting at 6:30. All are welcome.

CHURCH NOTICE

Odd Fellows Hall, Campbell. Full Gospel Services every Saturday at 8 p. m. Branch of Upper Room Mission, Fourth and San Antonio Streets, San Jose. Brother Robeck of San Jose may be with us Saturday, Feb. 5th. Come and hear the living word. You are welcome.

All the country needs now to make happiness complete is a radio that will bring home the groceries, the mail, and a spool of 30-white thread.

PROTECT ALL INTERESTS GREAT AND SMALL

Some are shouting for trouble. Others are crying for peace. Both pleas are reaching the halls of Congress, the White House and the Department of State. What is the real situation with reference to American and other foreign interests in Mexico and Nicaragua? It is simply that individuals and corporations of the United States, Great Britain and other countries have lawfully acquired properties in those countries and are there to look after them. It is the duty of the Government to protect its nationals and their properties whenever they are endangered, whether people, lands or corporate interests.

Many are saying that stern measures with Mexico will be in behalf of millionaire oil interests. What of it? All legitimate business and all people are deserving of protection. Shall we refuse to protect our banks merely because the bankers happen to be wealthy men? Shall we tell Rockefeller and Ford to look out for themselves because they are rich? If the oil interests owned by Americans are under legitimate control, or whether they are or not, the failure to come to their protection is not the remedy. Proper redress lies in the law, in the courts, not in public opinion. We can't see why people want to live in foreign lands, but that is their own business, and unless they stir up trouble themselves, they are not to blame.

All interests of the nation are an asset to its wealth, its labor and its production. It is not wealth that hurts anybody, it is monopoly. Public opinion has become of late years more charitable toward corporate interests, because we have learned that in union of capital there is strength and power for economy, mass production and resultant material good for the masses. Twenty, thirty or forty years ago an editor would have been "shot at sunrise" for asserting that there was any good in a corporation. Today it is different. His legitimate weapon now strikes at proper control and regulation of corporate and public utility interests, with a fair return to those interests. And in this is found a broad field of endeavor. But there is no argument in saying that the Government should not protect a man, a set of men, or a corporation because their holdings are large. For he who does not want wealth and wouldn't take it, let him cast the first stone.

DISARMAMENT

Disarmament of suspicion, mistrust, greed, jealousy, hatred and the superiority complex are as vital to world peace as disarmament of guns, bombs and poison gas. The first will have to come before the latter can be made complete.

It is easier for a camel to go through the eye of a needle than for a rich man to get through life without paying either alimony or pin money.

That some men are deceitful is as plain as the nose on their face. But which face?

Many a fellow coming into the prime of life hasn't been primed yet.

Even though you believe all you hear you don't have to repeat it.

"Pay-Your-Bills Week" seems to come to often for some people.

February is a short month, but we hope nothing else will be short during it.

We can take lessons from the youth: even small boys don't go out of town to trade marbles.

He that boasts his town today will get a boost not far away.

It is reported that there are many dealers in some eastern cities each of whom would handle a mixed car of lettuce and celery but who cannot handle an entire car of either commodity. W. M. Sharp, a large celery shipper of Chula Vista, in company with the traveling freight agent of the San Diego and Arizona railroad, has been in Imperial valley recently, planning such combination shipments to smaller distributing points.

Following his program of work in the alfalfa inspection field, G. H. Hecke, director of the state department of agriculture, issued a warning to planters to be cautious in purchasing seed, and determine whether or not it was free from injuries inflicted in the process of threshing.

PIANO for sale near Campbell. High Grade quality piano to be sold at large discount. Terms \$10 monthly. For particulars and how seen write J. A. Givens Factory piano adjuster 66 Front Street, Portland, Oregon.

All Stockton is rejoicing over the news of President Coolidge's signing of the rivers and harbors appropriation bill which authorizes the federal appropriation of \$2,407,500 towards the consummation of the local deep water project. Stockton has vote bonds to the amount of \$2,000,000 for its share of the cost of bringing the sea to its waterfront. However, an appropriation by the state government of \$419,999 will make it necessary for Stockton to expend but \$2,581,000.

The Sacramento Northern Railroad company has applied to the state railroad commission for authority to discontinue its service between Suisun and Vacaville over the Fairfield route. The railroad company stated that although it had operated five trains daily and six on Sunday over the Fairfield route, it carried but four passengers a trip, and was forced to operate at a loss, due to increasing transportation facilities between Suisun and Vacaville.

FOR SALE—Player Piano, Sherman Clay make, excellent condition. Reasonable. Phone Campbell 128.

A Popular Investment

It is a mistaken idea that safe deposit boxes are luxuries intended only for persons of large means. A good-sized box capable of protecting property worth many thousands of dollars may be rented from the American Trust Company at a fraction more than a cent a day. The trifling cost now places this absolute protection of valuables within the reach of everyone.

California's newest hydro-electric development, the Balch plant of the San Joaquin Light and Power Corporation, will be completed early this month, marking the first unit in a contemplated \$50,000,000 power project on the Kings river. From the date of preliminary surveys, about seven years of effort and over \$5,000,000 have been expended in the construction of the plant, which will provide an additional 6,000 horsepower to meet the growing needs of the San Joaquin valley. The penstock, which is the harness for the water of the mountain stream, is the highest in the United States and is equipped with automatic controls making it the latest development in power plant construction.

Federal Judge Kerrigan, San Francisco took out of the hands of a jury and ordered non-suited an action in which the California and Hawaiian Sugar company sought damages of \$270,000 from the Mason By-Products company of Eureka, for alleged violation of contract on shipments of molasses from Hawaii. Judge Kerrigan, in upholding the motion of Attorney Theodore Roche for the defendant company, held that there was no actual contract between the parties. The sugar company alleged that the Mason company agreed to buy 30,000 tons of molasses at \$9 a ton, and had repudiated the contract.

Incorporated for \$150,000, two organizations plan the manufacture, sale and distribution of the only cold light of its kind ever discovered. Secretary of State Frank C. Jordan heads both organizations, and each will be capitalized at \$75,000. The cold light renders a glow in the dark, which makes the reading house numbers and finding of switch buttons easy during the night. The light is manufactured by a secret process, and is produced without use of regularly established glows. Headquarters of the two companies are to be located in the northern and southern part of the state.

S. F. SCHOOL GIRL WINS ESSAY MEDAL

For an essay on safety in traffic, written at her desk in the Sunshine School for Crippled Children, fifteen year old Irene Byrne today wears a silver medal and has \$10 toward her high school expenses.

The medal and check were presented to Irene by William M. Tudor, manager of the Public Safety Department of the California State Automobile Association, at the graduation exercises marking completion of the girl's course at the Sunshine School, maintained by the San Francisco Board of Education.

The little essayist has been building up a fund for her high school education through participation in literary contests of all types and has a goodly number of prizes to her credit.

The contest in which Miss Byrne's composition on public safety on streets and highways won second prize in California, is conducted annually by the National Automobile Chamber of Commerce for school children throughout the nation, with the Automobile Association cooperating in arrangements for participation of Northern and Central California schools.

Town Tales Tersely Told

T. L. Mendel is quite ill at the home of his son, Frank, in Palo Alto.

Mr. and Mrs. Merle Bibb have moved into one of the Wilson Apartments on Campbell Ave.

Born to Mr. and Mrs. John L. Fox (nee May Smith) at Westwood, January 26, an eight pound daughter.

Mr. and Mrs. Gilbert Newcomb are at Seabright for a couple of weeks where Gilbert is doing some building.

D. J. Sharp and family who have been occupying the J. H. Butts house on North Second St., have moved back to San Jose.

Mrs. Mary Lanphear, Miss Sadie Maxon and their nephew, J. H. Maxon spent Sunday with the Francis Lyman family in Oakland.

The Country Woman's Club will meet Monday, Feb. 7th, the topic to be considered being, "The Development of Our Language."

Mrs. Frank Gillis and daughter Miss Francis of Anoka, Minn., arrived Saturday evening for an extended visit with relatives, Mr. and Mrs. M. E. Purmort.

The Epworth League of the M. E. church are holding an entertainment and social time to which all the older friends of this busy organization are cordially invited this Friday evening.

Robert A. Shearer who underwent a nasal operation last week is reported steadily improving.

Mrs. Kate Carpenter, who has been in charge of the Tradewell Grocery and Creamery store here, has moved to Palo Alto, where another branch has been opened up.

Miss Mary Devitt who had been at home for a few days convalescing from a severe attack of Mumps, returned to Sacramento Sunday, where she is in the laboratory in one of the hospitals.

G. E. Jeffers who recently came out from Kansas and purchased a small tract of A. A. Purmort has practically completed his bungalow on Campbell Avenue and expects to move in soon.

Mr. and Mrs. W. J. Ullom, (nee Mary Thompson) have the sympathy of their friends in the loss of their infant son who lived but two days. Private funeral services were held Saturday afternoon at Los Gatos.

The W. C. T. U. will meet with Mrs. A. J. Farley, Wednesday, Feb. 9th at two thirty. Final arrangements will be made for the Institute to be held on February 15th, in the M. E. Church. The Rev. Jessie G. Heath will be the leader.

Among the graduates from the State Teachers' College, who received diplomas Wednesday were Irene B. Prston, Ada E. Smith and M. Marion Smith from the General Elementary Course, and Lucius E. Buck from Junior College. Of these, Miss Marion Smith is already teaching at Lucia, Monterey County.

Hi School Activities

DEDICATED TO THE NEW FRESHMEN

Monday morning many new faces were seen within the corridors of high school. There were boys and girls from everywhere coming into school to take another step toward the gate of success and knowledge.

Many times the old walls have seen faces come and go, some with the look of brightness, others going out looking as if they had not attained any good from their schooling. There were many kinds of boys and girls Monday, some who will go far in life and others perhaps who will fall along the roadside, but all, we hope, will benefit by their stop in high school and will go out with a more mature and cultivated mind and body.—S. Merrill

Freshmen everywhere! The high school is a veritable old woman's shoe with so many children she does not know what to do with them.

Monday the busses were crammed and jammed. One had sixty-six and had to go back for the rest. This makes necessary two trips before and after school. In assembly Monday, there were many who had to stand up in the back of the hall, there not being enough seats. Assemblies here after will have to be shortened as much as possible. Many of the students will be able to take only two subjects. They will have two periods of the same subject each day. Thus they will have completed in June the work of two semesters, or a full school term in the two subjects.

This situation greatly puzzles both the principal and the students and the only possible solution thought of is a new school.

HONOR LIST Second Quarter—1926-27

First Honors All 1's
Helen Buck, Pauline Guida, Wilhelmina LeGrand, Helen Lennox, Mary Maxon, Hazel Ousley, Emma May Rapp, Clyde Scheuermann, Louise Smith, Elsie Swanson, Glenn Smith.
Second Honors One 2 the remainder 1's
Dorothy Geer, Conrad Gaiser, Merle Gardner, Eulah Hook, Oldrich Kalas, George Mattos, Elsie Merrill, Elizabeth Rapp, Helen Stray, Elmer Sundquist, Ebba Swanson, Elin Swanson, Harvey Voge.

Third Honors Two 2's or one 3 remainder 1's
Emmi Berry, Yenni Berry, Everett Bradley, Mildred Cannon, Nick Casella, Grace Ferro, Rose Fisci, Ernest Furtado, Ida Furtado, Clinton Hocking, Clara Knopf, Anna Lovoi, Carazina Mladnich, Robert Newton, Elwyn Overshiner, Phoebe Payne, Eva Robinson, Jean Ross, Lawrence Templeton, Ruth Townsend, Margaret Tutt, Antoinette Zillmer.

HIGH SCHOOL BAND

The number of players in the band of the Campbell Union High have been greatly increased this year. It is now under the direction of Mr. Thielke, who has had much experience as a director of navy bands. He is also connected with work of this kind in the Los Gatos High School. The band has been practicing on Thursday of each week and has played at one or two public gatherings at Campbell. Mr. Thielke has been working up a special number and the band will be heard on the twenty second of February as a part of the Old Settler's program.—Robert Newton.

ART CLASS

The pupils of the Applied Art class in the high school are making some very pretty trays in batik. The designs they apply are original and a great deal of work has been spent on them. The designs when finished, are traced on china silk and the outlines waxed. Dyes are then put in and when the dye is complete, the silk is washed in gasoline. This takes out the wax and leaves a white outline around the design. The silk is then pressed and placed under glass. The pupils weave the trays themselves, so the trays when finished are truly hand made original products.—Evelyn Jensen.

Mr. and Mrs. Steindorf of Union district are enjoying a visit with his brother and wife, who arrived recently from Watertown, Wis.

To Restore Old Mission

Friends of art and history were perfecting plans in Campbell today to cooperate locally in the proposal to restore the charming old Mission of Santa Clara as an enduring monument of history and romance.

Under plans outlined by A. B. Post, banker and chairman of the Central California Restoration Committee, a local committee will be formed along non-secretarian lines to enlist the aid of friends of history and art in saving one of Californian's most valued treasures.

A movement to restore the Mission was inaugurated while the flames were still sweeping over the ancestral walls at the fire on the morning of October 25, last. The proposals call for the expenditure of \$150,000.00 to construct buildings of concrete along the lines of the original Mission built by the Indians 150 years ago.

Only one-half of the construction costs, or \$75,000.00 will be raised in the campaign. The remaining half is to be raised in campaigns to be conducted independently by the Native Sons and Daughters of the Golden West and the friends of art and history in San Francisco, Los Angeles and elsewhere.

The Junior Class

The junior class meeting held January thirty-first appointed committees for refreshments, entertainment, and transportation. The Junior Class party was decided by the class to be held at Opal Overshiner's residence in the Willows, February 12th. All juniors who are going to the party are working together to make their first party a success.—Elizabeth Rapp.

New Water Mains

The Campbell Water Co. is replacing the old with new pipes on Sunny Side Avenue from Whitehall Street to Los Gatos Road.

Other replacements for increased service are anticipated for the near future. The six water hydrants which were being installed are now completed and ready for use.

On account of the demand of Napa farmers, the agricultural department of Napa Union high school has resumed the Babcock milk tests which were successfully conducted last year. Any farmer who desires to learn what percentage of butterfat his cows are giving is thus afforded an opportunity to do so without cost. The test is carried on by the students of the department, and no student is permitted to make the test until he has demonstrated that he is competent. In addition to testing whole milk the school will also make skimmed milk tests in order that farmers may check up on the efficiency of their separators.

The California Cattlemen's association announces it has been successful in its efforts to have the railroads establish half rates on pure-bred stock shipped from the middle West in less than carload lots. The arrangements, while definitely established, are not yet in effect, but the date on which the new rates will become effective will be set in the very near future. The reduced rates will enable stockmen to purchase pure-bred bulls in the middle West and ship them West at savings ranging as high as \$75 per head. The reduction applies to shipments going to the middle West as well as from that section.

It is all right to do as the Romans do occasionally, but in the matter of pruning grapes they were all wrong and framers who have been doing as they did for the last thousand years are cutting down their own profits. So says A. J. Winkler, assistant viticulturist at the Davis Farm branch of the University of California, who has just published an article disproving the value of pruning. Winkler found after lengthy experiments on vines that pruning had a depressing effect on capacity, manifested by a smaller trunk circumference, length growth, and leaf production.

The Pomona plant of the Cutler-Lobingier Packing company closed a very successful season the first of the year, completing the largest pack of apricots, peaches, tomatoes and pie pumpkins in its history.

In 1926 California produced the largest cotton crop since this industry became of importance here, and in spite of existing conditions many California growers made excellent profits last year and are in a more fortunate position than the producers of the southern states.

Grain crops are reported from Springville and adjoining foothill districts, Tulare county, to be in varying stages of development, all of which are said to be rather promising at the present time.

MOTOR CARS FOR EVERY FAMILY

Constituting a new high record in the history of automobile production, the total passenger motor car and motor truck production in this country during 1926 was 4,480,000,—about 150,000 cars more than the year previous.

In view of the extreme importance of the automobile industry as the most pivotal single industry in the country, as well as one of the best indices of the country's prosperity at any time, a great deal of interest is felt in the prospects for prosperity and profit in the automobile field during the coming year.

As a result of this enormous production there is at present roughly one registered automobile for every five persons in the United States, or nearly one car for every family, according to computations of Leib-Keyston and Company.

Thus, some apprehension is beginning to be felt in manufacturing circles that the new car saturation point must nearly be reached, if it has not already been exceeded, at the present time, and for this reason automobile manufacturers will produce fewer automobiles during 1927. It is estimated by authorities on this subject that approximately 4,100,000 vehicles will be produced next year, which would represent a reduction of 8½ per cent from the 1926 record.

SIMPLE MIXTURE STOPS GAS BLOATING

Simple buckthorn bark, glycerine, etc., as mixed in Adlerika, often helps stomach trouble in TEN minutes by removing GAS. Brings out a surprising amount of old waste matter you never thought was in your system. Stops that full, bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Adlerika works QUICK and delightfully easy.—Orchard City Drug Co.

WAR RISK LIFE INSURANCE NEWS AND PROCLAMATION OF COOLIDGE

During the World War the United States Government insured, at an exceedingly low premium rate, nearly 5,000,000 members of the armed forces of the country against death or total permanent disability. The insurance thus granted was for the greater protection of the insured and their dependents than was afforded in the compensation, independently of insurance and unconnected therewith, which was provided for death or disability resulting from personal injury, or disease contracted in the military service.

Statutory provision was made for the continuance of this war risk insurance after the termination of the war, and its conversion within a limited time into such form or forms of insurance, usually issued by life insurance companies, as the insured might request. Many veterans do not seem to have had knowledge of this continuing privilege and for one reason or another have permitted their war risk insurance to lapse. Under the terms provided for the re-establishment of lapsed insurance, normal health conditions will permit reinstatement upon the payment of two monthly premiums; and for those whose service disabilities render them otherwise not insurable, and who are not permanently and totally disabled, provision is made for reinstatement upon the payment of premiums and interest for the period of lapse. Even these payments may be temporarily waived for those whose resources do not permit immediate compliance.

The law provides that no reinstatement of war risk life insurance which has lapsed shall be made after July 2, 1927. After that date, such war risk term insurance cannot be reinstated. On or prior to that date, therefore, such insurance must be reinstated and converted, at the election of the applicant, into one or more of the seven standard forms of life insurance provided by the Government. If such insurance is now in force, the insured must convert it into one of the forms above mentioned on or before the above date.

Symbol of Mohammed Adorns Egypt's Flag

The flag of the new kingdom of Egypt has a green field, the favorite color of the prophet Mohammed, with a white crescent and three white stars. The stars and crescent formed originally the symbol of the goddess Diana, who was the patroness of Byzantium, afterwards Constantinople. When the Turks captured Constantinople in 1463, they adopted this symbol as a badge of triumph and it remains a symbol in Mohammedan countries such as Egypt. The legend has it that Philip, father of Alexander the Great, tried to capture Byzantium one dark night, but the rising crescent moon revealed his soldiers to the inhabitants, who repelled the invasion. There were two famous Omars in Mohammedan history, each of whom was caliph or successor of Mohammed in the government of the Mohammedan world. Another famous Omar was the Persian poet and scholar Omar Khayyam, whose verses, the Rubaiyat, were translated by Edward Fitzgerald.

"Importing" Plants

The Leningrad institute of applied botany is organizing a series of expeditions to tropical countries for the purpose of importing the seeds of cereal plants which do not exist in the United States of Soviet Russia, but can be successfully cultivated. Professor Burasov is at present studying the cultures of potatoes, tomatoes, maize, sunflower, etc., in the western Andes of South America. Professor Voronov is at work in the Brazilian mountains, studying the types of rubber trees that can stand severe climate.—Washington Star.

Electric "Divining Rods"

Immense new deposits of ore containing gold, silver and copper have been located in northern Sweden by means of electrical prospecting devices, we are told by Dr. Axel Cavebo, chief of the geological department of the Swedish government. These electrical devices actually do what the old-fashioned "witch sticks" or "divining rods" were supposed to do. They find ore that is hidden from sight under ground.—Literary Digest.

The potential protective value of the insurance thus provided is apparent, as affecting the future economic and domestic welfare of veterans and their dependents. Provision is made for extended insurance, paid in values, loan values, cash surrender values, and dividend participations. No premium is charged during total permanent disability. Thousands of our national defenders are passing on each year. All veterans of the World War should be generally and fully informed of their right to procure the safe and certain protection for themselves and their dependents of the insurance offered by the Government.

Detailed information with reference to such insurance may be obtained from the Central Office of the United States Veterans' Bureau, Washington, D. C., or from its Regional Offices located throughout the country.

Wherefore, I, Calvin Coolidge, President of the United States, do hereby designate the period of January 31 to February 7, 1927, as a time during which special effort should be made to inform all veterans of the World War of the right they have to reinstate lapsed war risk life insurance, and to convert it into United States Government life insurance; and, that all such veterans may, in some manner, be properly informed, I urge all citizens, particularly employers, the press, labor organizations, women's associations, professional groups and civic and patriotic bodies, to secure full information and use such means of informing the veterans as may be most effective.

In Witness Whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this eleventh day of January in the year of our Lord one thousand, nine hundred and twenty-seven, and of the Independence of the United States the one hundred and fifty-first.

(Seal) CALVIN COOLIDGE.
By the President.
Frank B. Kellogg
Secretary of State.

Measuring Hat Heat

During a heat wave in Paris recently a group of scientists held an investigation to find out how hot hats were. The experiments were made at a temperature of 97 degrees Fahrenheit. The sporting cap was found to be hottest of all, with a heat beneath it of 98.6 degrees. The derby was next at 92 degrees. Felt hats showed only 86 degrees and the stiff straw 79 degrees. The Panama won over all with only 77 degrees—20 degrees cooler under the hat than outside.

EXPOSITION OF PROGRESS TO BE GIVEN AT S. J.

An exposition of Progress commemorating the 150th Anniversary of what is now Santa Clara County to be held in conjunction with the Second Annual Fiesta de las Rosas, April 30 to May 7, is the plan of the Executive Committee of the Fiesta, which is composed of the leading business leaders of San Jose.

The old convent grounds between Santa Clara and San Jose is to be the scene of this celebration, which promises to be the greatest and most outstanding event of its kind in the history of Santa Clara County.

The historical aspect of the Exposition will be emphasized and plans are under way obtaining some of the old relics and historical antiques that the older families of the county may still possess. The historical exhibit alone will occupy one entire tent or 30,000 square feet.

Another large tent will contain displays and exhibits from every community in the county and already several planning their exhibits.

Other large tents will contain an auto display, large exhibits of agricultural machinery by manufacturers and the county's leading industries. Firms of San Francisco and Oakland have already signified their intentions of participating.

Clean and wholesome riding devices and fun shows will occupy the carnival area. Many free attractions, free dances, and band concerts will be going on continuously.

The Exposition will carry on for eight days and will be climaxed by the great Floral Parade on Saturday, to which "outside" several cities have already pledged representative floats.
